# WEATHER OF CONCERN

## Weather of Concern

- High Pressure and Off Shore Winds will produce hot and very dry weather for portions of Southern California mountainous, desert and valley locations through 10/17/17.
- The National Weather Service is predicting a weather pattern change for Wednesday 10/18/17 through Friday 10/20/17, a system will drop down from the Gulf of Alaska into Northern California which will bring wetting rains to the entire region.

## **Active Weather Warnings, Watches and Advisories by County:**

- <https://alerts-v2.weather.gov/counties/CA>

# WEATHER SYNOPSIS BY REGION

## **NORTHERN CALIFORNIA**

**\*\*\* VERY DRY air in place through Wednesday, with spotty NE/Offshore wind through Tuesday \*\*\***

**\*\*\* Increasing S-SW winds Shasta Valley and E of the Crest Wednesday and Thursday afternoons \*\*\***

High pressure overhead today will move east on Tuesday. N-NE/Offshore winds will gust to 20-25 mph through Tuesday in a few wind-prone areas from the western Sierra slopes to the coast, primarily in the Sierra foothills and in the Bay Area, and mainly from late evening until late morning. Very dry air will remain in place, with daytime RH 10-20% and overnight RH recovery to 20-40% on mid and upper slopes and in breezy areas.

On Wednesday a light onshore flow pattern will begin to push cool humid marine air into coastal areas at lower elevations and S-SW winds will begin to increase over the higher terrain in the north as a Pacific low pressure system approaches. Dry air will still be in place (RH 10-20%), and a few areas such as the Shasta Valley including Weed and areas along and east of the Cascade-Sierra crest will see afternoon gusts to 25 mph. On Thursday the low pressure system will reach the region and clouds, humidity and S-SW winds will increase. There will be a few hours Thursday afternoon in the same areas with somewhat dry conditions (RH 17-30%) and strong pre-frontal S-SW winds (gusts to 30-40 mph) before higher RH and rain move in. Widespread light to moderate rain is possible late Thursday through Friday north of a line from Clear Lake to Lake Tahoe, and areas as far south as Marin County may see up to a tenth of an inch of rain.

Another low pressure system will bring rain to far NW CA on Saturday while the remainder of the region begins to dry out. A significant warming and drying trend is expected following the trough passage late next weekend.

## **SOUTHERN CALIFORNIA**

**\*\*\*Hot and very dry today\*\*\***

**\*\*\*Strong north winds across Santa Barbara County and the Grapevine Friday night through Saturday morning\*\*\***

**\*\*\*Strong offshore winds along with hot and very dry conditions across Southern California Sunday morning through Tuesday morning\*\*\***

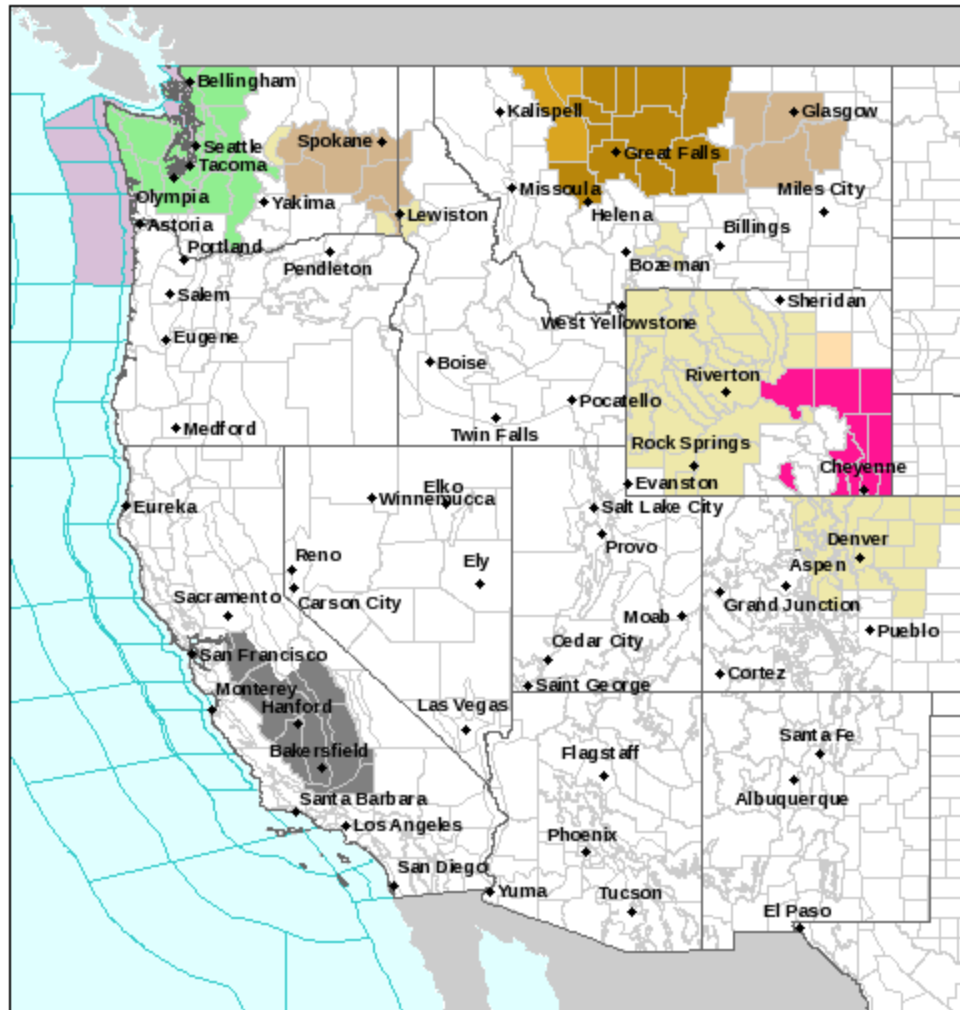

Strong high pressure aloft over California will bring hot and very dry conditions to the entire region today. Temperatures will be 10 to 20 degrees above normal, with 70s to low 80s across the mountains, mid 80s to low 90s in the Central California valleys, and mid 90s to 102 in the Southern California valleys. There will be widespread single digit humidity across the area today. High pressure will weaken Tuesday and Wednesday and then a Pacific trough will approach the West Coast Thursday and push inland Friday bringing a cooling trend and an increase in humidity.

Temperatures will be near normal Thursday and 5 to 10 degrees below normal Friday. Westerly winds of 20 to 30 mph with gusts to 50 mph will surface across the wind prone mountain and desert areas Thursday afternoon through Friday afternoon. A strong ridge of high pressure will build into California from the southwest bringing significant warming along with minimum humidity in the single digits and teens Saturday through early next week. Widespread 90s will occur across the coastal and valley locations of Southern California starting Sunday. Northerly winds of 20 to 30 mph with gusts to 50 mph will surface across much of Santa Barbara County and the Grapevine Friday night through Saturday morning and then these strong and gusty winds will transition to the northeast and east Sunday morning through Tuesday morning and affect much of Southern California.
